Testimonial

As an exchange student from Korea had been major in department of building in NUS, I had an opportunity to work for internship in DK Outsource. I was so excited to work in DK, because it is the first time for me to work for internship.

Although I just worked for 4 weeks from 5 Dec 2011 to 30 Dec, I could learn many things about that how I can read drawing (CAD) well, do Quantity Survey. And I could get to experience about different kind of buildings like car-park, multi-purpose building, MRT and upgrading of building in school or store that I couldn't have the chance to learn in the class of university.

I am sure that the internship experience in DK Outsource will be beneficial and help me to work well later in Korea.

During I have worked in DK, I could work in comfortable circumstances and get used to working in company because many colleagues were so kind of me.

I appreciate what DK family give to me about gaining experience from Quantity Survey. The internship period was very valuable time for me to think about my future.

Thanks you.
